

About Me

Enthusiastic Flutter Developer with 1 year of experience in building and deploying cross-platform mobile applications. Experienced in using Dart, Firebase, and advanced state management tools like Bloc, Provider, and GetX to deliver feature-rich and scalable applications. Adept at crafting responsive, intuitive user interfaces while ensuring optimal app performance. Committed to creating innovative and impactful solutions to solve complex problems. Passionate about staying updated with the latest technologies and following best coding practices to deliver high-quality, maintainable software.
